Baltus sustainability park

Showgarden

Flower bulbs are a beautiful product of nature. As a green business, we understand better than anyone how important nature is. Without it, our flower bulbs simply would not be able to bloom.

That is why sustainability is at the heart of everything we do. We actively invest in biodiversity with our own sustainability park, where there is space for bees and butterflies. We also have a study garden for beekeepers and apiculture and our own show garden, where we demonstrate how our products truly come to life.

Behind the scenes, we are also making great progress. We are becoming increasingly self-sufficient in energy and now have more than 500

solar panels. In addition, we have switched to a new packaging system using sustainably recycled foldable crates, which can also be used for presentation purposes.

We also make conscious choices in our packaging and presentation. For example, 80% of our packaging is environmentally friendly and we recycle our displays wherever possible. In this way, we contribute to a greener future every day. Because without nature, there are no beautiful flower bulbs. And that would be a shame, wouldn't it?

Duurzaamheidspark

Bloembollen zijn een prachtig product van de natuur. Als een groenbedrijf weten wij als geen ander hoe belangrijk die natuur is. Zonder haar zouden onze bloembollen simpelweg niet kunnen bloeien.

Daarom staat duurzaamheid bij ons centraal. We investeren actief in biodiversiteit met ons eigen duurzaamheidspark, waar ruimte is voor bijen en vlinders. Ook hebben we een studietuin voor imkers en bijenhouderij en een eigen showtuin, waar we laten zien hoe onze producten tot hun recht komen.

Achter de schermen zetten we ook grote stappen. Zo zijn we steeds meer zelfvoorzienend in energie en beschikken we inmiddels over meer dan 500 zonnepanelen. Daarnaast zijn we overgegaan op een nieuw emballagesysteem met duurzaam gerecyclede klapkratten die tevens als presentatie kunnen worden gebruikt.

Ook in onze verpakkingen en presentatie maken we bewuste keuzes. Zo is 80% van onze verpakkingen milieuvriendelijk en recycleren we onze displays waar mogelijk. Op deze manier dragen we elke dag bij aan een groenere toekomst. Want zonder natuur, geen mooie bloembollen. En dat zou toch zonde zijn?

Nachhaltigkeitspark

Blumenzwiebeln sind ein wunderschönes Produkt der Natur. Als grünes Unternehmen wissen wir wie kein anderes, wie wichtig diese Natur ist. Ohne sie könnten unsere Blumenzwiebeln schlichtweg nicht blühen.

Deshalb steht Nachhaltigkeit bei uns im Mittelpunkt. Wir investieren aktiv in die Biodiversität mit unserem eigenen Nachhaltigkeitspark, in dem es Raum für Bienen und Schmetterlinge gibt. Außerdem verfügen wir über einen Studiengarten für Imker und Bienenhaltung sowie einen eigenen Schaugarten, in dem wir zeigen, wie unsere Produkte optimal zur Geltung kommen.

Hinter den Kulissen machen wir ebenfalls große Fortschritte. So werden wir zunehmend energieautark und verfügen mittlerweile über mehr als 500 Solarmodule. Darüber hinaus sind wir auf ein neues Verpackungssystem mit nachhaltig recycelten Klappkisten umgestiegen, die zugleich auch zur Präsentation verwendet werden können.

Auch bei unseren Verpackungen und in der Präsentation treffen wir bewusste Entscheidungen. So sind 80 % unserer Verpackungen umweltfreundlich und wir recyceln unsere Displays, wo immer es möglich ist.

Auf diese Weise tragen wir jeden Tag zu einer grüneren Zukunft bei. Denn ohne Natur keine schönen Blumenzwiebeln. Und das wäre doch schade, oder?

The new way of gardening: simple and accessible.

Natuurlijk in balans

De seizoenshighlight voor het najaar: zorgvuldig samengestelde combinaties van voorjaarsbloeiers zoals tulpen, crocussen en narcissen, aangevuld met natuurlijke begeleiders zoals klaver, bieslook en koriander. Ze groeien en bloeien tegelijkertijd en versterken elkaar, wat zorgt voor een rijk en levendig bloeibeeld. Daarnaast helpen deze combinaties ongewenste insecten te weren en trekken ze juist nuttige insecten aan. Zo ontstaat een gezonde, evenwichtige tuin met meer variatie en uitstraling.

De nieuwe manier van tuinieren: eenvoudig en toegankelijk.

Natürlich im Einklang

Das saisonale Highlight für den Herbst: sorgfältig zusammengestellte Kombinationen aus Frühjahrsblüchern wie Tulpen, Krokussen und Narzissen, ergänzt durch natürliche Begleitpflanzen wie Klee, Schnittlauch und Koriander. Sie wachsen und blühen gleichzeitig und unterstützen sich gegenseitig, was zu einem reichen und lebendigen Blütenbild führt. Zudem helfen diese Kombinationen, unerwünschte Insekten fernzuhalten und gleichzeitig nützliche Insekten anzuziehen. So entsteht ein gesunder, ausgewogener Garten mit mehr Vielfalt und Ausstrahlung.

Die neue Art zu gärtnern: einfach und zugänglich.

Sustainable Bloom

Our BIO spring-flowering bulbs are carefully grown to bring a colourful and lively start to the season. From daffodils to tulips, each variety contributes to a rich and varied spring display.

The bulbs are organically grown and packed in environmentally friendly, biodegradable materials. This means you're not only choosing a beautiful garden, but also a more conscious and sustainable option.

These blooms also support biodiversity by attracting bees and other beneficial insects, helping to create a garden that is not only beautiful, but also part of a healthy ecosystem.

Duurzaam in bloei

Onze BIO voorjaarsbloeiers zijn met zorg geteeld en zorgen voor een kleurrijke en levendige start van het seizoen. Van narcissen tot tulpen: elke soort draagt bij aan een rijk en gevarieerd voorjaarsbeeld.

De bollen zijn biologisch gekweekt en verpakt in milieuvriendelijke, afbreekbare materialen. Daarmee kies je niet alleen voor een mooie tuin, maar ook voor een bewuste en duurzame oplossing.

Daarnaast dragen deze bloeiers bij aan de biodiversiteit door bijen en andere nuttige insecten aan te trekken. Zo ontstaat een tuin die niet alleen mooi oogt, maar ook bijdraagt aan een gezond ecosysteem.

Nachhaltig zum Blühen

Unsere BIO-Frühjahrsblüher werden mit Sorgfalt angebaut und sorgen für einen farbenfrohen und lebendigen Start in die Saison. Von Narzissen bis Tulpen trägt jede Sorte zu einem abwechslungsreichen und reichen Frühlingsbild bei.

Die Zwiebeln sind biologisch angebaut und in umweltfreundlichen, abbaubaren Materialien verpackt. Damit entscheiden Sie sich nicht nur für einen schönen Garten, sondern auch für eine bewusste und nachhaltige Lösung.

Außerdem fördern diese Blüher die Biodiversität, indem sie Bienen und andere nützliche Insekten anziehen. So entsteht ein Garten, der nicht nur gut aussieht, sondern auch zu einem gesunden Ökosystem beiträgt.

For bees and butterflies

The world is growing, but the number of plants and trees is decreasing. Increasingly, green spaces and nature are being replaced by buildings and roads. As a result, the natural habitat of insects is shrinking, especially for bees and butterflies.

Flower bulbs not only add color to your garden, but their rich nectar also turns it into a paradise for bees and butterflies.

Samen voor bijen en vlinders

De wereld groeit, maar het aantal planten en bomen neemt af. Steeds vaker maken groen en natuur plaats voor bebouwing en wegen.

Daardoor wordt de leefomgeving voor insecten kleiner, vooral voor bijen en vlinders. Bloembollen zorgen niet alleen voor kleur in uw tuin, maar maken het dankzij de rijke nectar ook een paradijs voor bijen en vlinders.

Nachhaltig zum Blühen

Die Welt wächst, doch die Zahl der Pflanzen und Bäume nimmt ab. Immer häufiger weichen Grünflächen und Natur neuen Gebäuden und Straßen. Dadurch wird der Lebensraum für Insekten kleiner, besonders für Bienen und Schmetterlinge.

Blumenzwiebeln bringen nicht nur Farbe in Ihren Garten, sondern machen ihn dank ihres reichen Nektars auch zu einem Paradies für Bienen und Schmetterlinge.
